Enthroned on Our Praises

Brenton Dowdy

Verse:

```
Em                    D/F#                        A
  Let the song we sing be an overflowing theme
                                                   Em
From the bottom of our hearts we lift You up
              D/F#                A
You're the name above all names
Em                       D/F#                       A
  Let the praise we bring be an overflowing spring
                                              Em
Where the waters never run out or dry up
                     D/F#                  A
Enthrone Your presence on our praise
Em                  D/F#                  A
  Enthrone Your presence on our praise
```

Chorus:

```
G                   A                        Bm
  There is one victory, there is one song
                 F#m
We will sing it, we will sing it to You
G                   A                          Bm
  There is one kingdom, there is one throne
                   F#m                       ( G )
You will bring it, You will bring it as we sing
```

Bridge:

```
G                            A                        Bm
  We lift You up, Your kingdom comes down
                                            D/F#       G
We sing Your praise, we see Your glory all around
                                        A                Em
We shout Your name and we tremble at the sound
D/F#            G                  A            (      Em    D/F#  G     A  D  )
  You are enthroned on our praises              ( enthroned on    our praises )
                                                  only last time, into Chorus
```
